# ECHOGRAPH 1095 – The New Generation of Manual Ultrasonic Testing

The convenient transport case provides space for extensive accessories

Mobile ultrasonic inspection with the ECHOGRAPH 1095 in the practical carrying case

## ECHOGRAPH 1095 – High-tech meets comfort: Ultrasonic Testing made simple

Besides the proven qualities of its predecessor model the new ultrasonic flaw detector ECHOGRAPH 1095 features time corrected gain and backwall echo attenuation. It is the ideal instrument for manual ultrasonic testing: digital, high-contrast and comfortable in practical applications. It is reliable and sturdy and thus can be used outdoors or in rough industry environment.

### The ECHOGRAPH 1095 ...

- is lightweight (only 2 kg) and easy to handle
- is equipped with a very large and high-contrast TFT colour display (7" diagonal, resolution 800 x 480 pix) with automatic brightness control and a large viewing angle
- guides the user safely and self-explanatorily through the applications by means of its plain text menu
- ensures extremely simple and complete adjustment with its user guidance
- supports the operator during probe handling and instrument adjustment (DGS, DAC, TCG, AWS, JIS, ...)
- offers direct access to all important key functions
- displays up to 6 measured values in large digits
- is equipped with 3 monitors to measure amplitude and time-of-flight, as well as 3 associated control lamps on the front panel for monitoring threshold values
- enables to show reference echoes and to record echo dynamics
- enables simple freezing and storing of A-scans
- allows to move all 3 monitor gates in "freeze" mode or in a stored data set and recalculates the displayed measured values accordingly
- comes with a convenient text editor which enables the storage of each data set with an individual file name
- contains a probe data base for easy entering of probe data, even for third-party probes
- displays all functions in plain text on the screen, in addition to the 6 function keys
- permits selection of the pulse repetition frequency (PRF) from 10 Hz up to 5000 Hz: low PRF to avoid ghost echoes, and high PRF for high testing speed in case of automated testing
- saves all data, e.g. screenshots as BMP files or series of measurements as CSV files, on a removable 8 GB industrial SD flash card
- evaluates the time-of-flight between transmitter pulse and an echo within the monitor gate
- measures the wall thickness between transmitter pulse – backwall or backwall – backwall, either between echo peaks, edges or zero crossings
- provides 0.01 mm indication accuracy in the evaluation mode wall thickness measurement with zero crossing triggering
- allows evaluation also on curved surfaces (e. g. pipes)
- provides a VGA output for external monitors
- is delivered with a colour rubber protective holster to avoid sliding and for additional protection
- offers a separate adjustable gain in the third monitor, e. g. for individual backwall echo attenuation
- has an adjustable square pulser with a pulse width automatically adapted to the frequency of the probe when it is loaded, but which can be changed manually as well
- features digital filters for optimal adaption to the probe
- is dust-proof and provides protection against water jets according to IP65

The ECHOGRAPH 1095 available in 4 versions:

- 1095 Basic
- 1095 DAC/TCG/AWS
- 1095 DGS/DAC/TCG
- 1095 DGS/DAC/TCG/AWS/JIS

Options:

- Matrix memory
- TOFD
- B-scan
- Strip chart
- Interface module for external control

### Packages and scope of supply

	order nos.
<b>ECHOGRAPH 1095 Basic</b>	1095.020
<b>ECHOGRAPH 1095 DAC/TCG/AWS</b>	1095.030
<b>ECHOGRAPH 1095 DGS/DAC/TCG</b>	1095.040
<b>ECHOGRAPH 1095 DGS/DAC/TCG/AWS/JIS</b>	1095.050
<i>included in delivery:</i>	
<i>instrument with red protective holster, Li-ion rechargeable battery, mains/charging device and transport case</i>	
<b>Accessories for the standard package:</b>	
Carrying case incl. belt	6189.101
Interface box IFB to connect a PLC	
Standard / Hi Speed	1877.201 / 1877.202
USB cable	1657.704
eCom 95, PC software for	
Windows XP/7/8/10 Desktop	1995.007
Spare battery pack 7.4 V; 7.6 Ah	1808.551
Charger unit for external charging of a spare battery	1808.531

# Matrix Memory

## TOFD (Time-of-Flight Diffraction)

### Matrix Memory

Measured values can be stored to cells of a matrix grid. If the matrix grid is assigned to measurement locations of the part to be tested, assessment of the results is much easier due to the visual impression of the possible flaw distribution.

#### Set-up:

- Up to 1300 cells are possible
- Preset templates can be created
- Easy set-up by means of user guidance (wizard)

#### Evaluation:

- All measured values incl. A-scan are stored
- Evaluation of the matrix (min., max., mean value) is possible on the device
- All readings from the monitor gate plus A-scan can be indicated

### TOFD (Time-of-Flight Diffraction Technique)

The evaluation of diffraction signals from the edges of the discontinuities permits determination of the flaw position and size.

#### Storing of A-scans:

- A-scans are stored with raw data

#### Further functions:

- Wizard to set-up TOFD scaling
- Assignment of colour gradation in the TOFD-scan is also possible after scanning
- Automatic scan stop or endless scan, also with encoders
- Break function (scan can be halted)

# B-Scan Strip Chart

## B-Scan

The B-scan provides more information: Rather than just recording a single reading from the monitor gate, the entire A-scan from each probe position is stored.

Small inclusions, changes in the material structure, near-surface or deep-located reflectors can be found and displayed more easily.

## Strip Chart

The location is determined by means of a position encoder and transmitted digitally to the device.

Recording of measured values:

- For each probe position, the wall thickness, amplitude and sound path of all three monitor gates are stored
- An A-scan and up to two scans of readings can be shown simultaneously.
- All measured values can be stored

Advantages over a B-scan:

- Max. pulse repetition frequency of 5 kHz
- Strip chart can be used together with drop of back wall and TCG
- No restriction concerning the adjustment range

## Operating the ECHOGRAPH 1095

The powerful ultrasonic flaw detector features 3 monitors for amplitude and time-of-flight measurement and 3 associated status lamps on the front panel for monitoring of threshold levels. The very compact instrument (54 mm case depth) provides fast digital ultrasonic electronics with a high sampling rate and pulse repetition frequencies up to 5000 Hz.

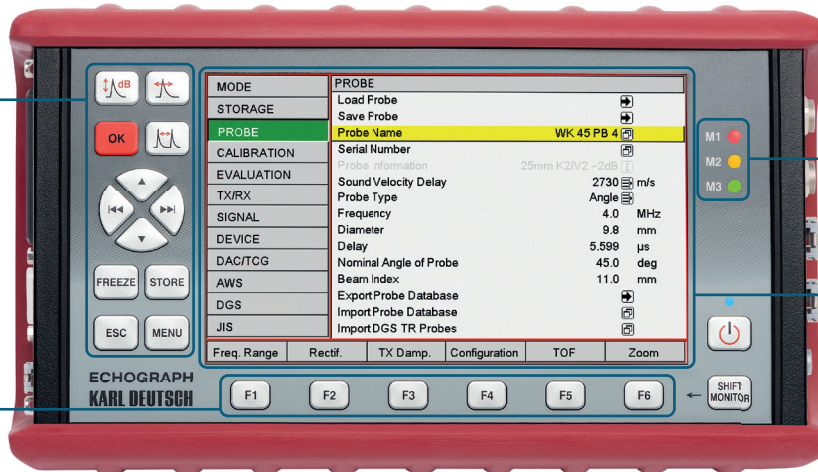

A convenient user guidance supports less-trained UT inspectors, also during probe handling and instrument adjustment: Simply activate the wizard and follow the instructions on the screen. Even difficult evaluation procedures for defect sizing (DAC/TCG, JIS, AWS and DGS) are carried out almost automatically.

The essential functions can be directly accessed via the foil keypad.

The 6 freely programmable function keys (F1 to F6) provide two different function levels. Switching between them is accomplished with the "SHIFT/MONITOR" button.

1st level:  
6 freely programmable function keys, here, for instance, direct access to: rectification, transmitter damping, device configuration, time of flight, zoom

2nd level:  
Adjustment of the three monitors (position, width, threshold)

Separate visual indications for evaluation of the monitor thresholds (M1, M2, M3)

The high-resolution display is easy to read with a clearly arranged indication of parameters.

### Echo evaluation DGS method (option):

- Not restricted to special probes (DGS curve is calculated within the instrument)
- Visualisation of the reference DGS curve
- Defect size (FBH = flat bottom hole) is directly shown
- DGS with KARL DEUTSCH TR probes
- Indication of up to 6 additional threshold curves

### Echo evaluation DAC method (option):

#### Reference line method (EN 1330-4)

- Optical and acoustical alarm when exceeding or dropping below the curve
- Indication of up to 6 threshold curves
- DAC support points can be manually added, shifted and deleted (up to 16 points)
- Calculation of time corrected gain (TCG) from the DAC curve

# Extensive Functions Application Examples

## Time Corrected Gain (TCG)

Clearly visible icon indicates the currently active evaluation method.

Recording of the DAC curve

For TCG evaluation the gain is adjusted depth-dependent according to the previously recorded DAC curve.

## Backwall echo attenuation via separate gain in monitor 3

Can be combined with many other functions, such as DGS, DAC and wall thickness measurement.

MODE		EVALUATION PARAMETERS	
STORAGE	Monitor 1	On	<input type="checkbox"/>

## Wall thickness measurement

Precise wall thickness measurement between zero crossings with averaging and min/max storage (e.g. for corrosion mapping)

Current wall thickness: |M1 - M2|  
Current sound velocity: c  
Lowest wall thickness: |M1 - M2| min  
Highest wall thickness: |M1 - M2| max

## Adaption to curved surfaces

Calculation of defect depth and reduced projection distance considering the parameters of test object and probe.

# ECHOGRAPH 1095

## Additional Features

# Technical Data

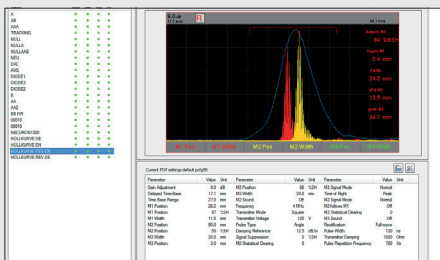

### Envelope Curve:

For evaluation of the echo dynamics the envelope curve can be recorded.

**Reference Curve:** Stored data can be used as reference curve. Thus, in case of repeated testing, the current result can be directly compared with the previous measurement.

### Data Storage:

All data records are stored on a removable 8 GB SD industrial flash card. Screenshots are saved as BMP files and measurement values as CSV files. Test reports can be easily created in a comfortable way with our eCom 95 software.

### Overview of more features of the ECHOGRAPH 1095

- Rugged metal housing with rubber protective holster for rough environmental conditions
- Continuously adjustable stand with anti-slide coating
- Selectable screen colours for A-scan
- Antireflective protective glass
- USB interface
- Three optical indicators and an acoustical alarm output
- Energy saving mode in battery operation
- Built-in Li-ion-rechargeable battery (built-in charging processor); charging of the battery also during test if connected to the mains power supply
- Easily exchangeable battery
- Use of industrial SD flash cards up to 32 GB
- Update resp. upgrade via SD flash card and/or via unlock code
- Specifications acc. to EN ISO 22232-1

### Screen

<b>Screen type</b>	<ul style="list-style-type: none"> <li>▪ Colour TFT LC display, transmissive</li> <li>▪ LED background illumination (with automatic adaption to the ambient light)</li> </ul>
<b>Screen size</b>	152.4 mm x 91.44 mm
<b>Resolution</b>	800 x 480 pixel, 256 colours
<b>A-scan size</b>	152 mm x 76.2 mm
<b>Scaling</b>	generated electronically
<b>Scale division</b>	<ul style="list-style-type: none"> <li>▪ coarse: 10-fold horizontal, 5-fold vertical</li> <li>▪ fine: 25-fold horizontal</li> </ul>

### A-Scan Representation and Digitizing

<b>Image refresh frequency</b>	60 Hz
<b>A-scan representation</b>	<ul style="list-style-type: none"> <li>▪ normal display</li> <li>▪ filled echoes</li> <li>▪ frozen</li> <li>▪ echo dynamics curve (envelope curve)</li> <li>▪ zoom across monitor 1 and monitor 2</li> <li>▪ Option: Matrix Memory, B-Scan, Line Scan, TOFD</li> <li>▪ Reference curve</li> </ul>

<b>RF representation</b>	with zero crossing measurement
<b>Rectification</b>	full wave, positive, negative
<b>Suppression</b>	adjustable: 0 – 99 % screen height in 1 % steps (linear)
<b>Zoom</b>	monitor range (monitors 1 and 2)

### Measuring Ranges

<b>Time-base range</b>	0.5 – 17760 mm steel
<b>Sound velocity</b>	200 – 15000 m/s in 1 m/s steps
<b>Pulse shift</b>	0 – 3000 mm in 0.1 mm steps
<b>Linearity of time base</b>	± 0.5 % of screen width
<b>Pulse repetition frequency</b>	10 – 5000 Hz, for square wave pulser up to 1000 Hz (automatic optimization [Auto High, Auto Low] or manual adjustment)
<b>Trigger</b>	internal, external, 1st echo

### Transmitter

<b>Transmitter type</b>	square wave pulser
<b>Transmission voltage</b>	60 – 320 V
<b>Pulse width</b>	30 – 5000 ns in 10 ns steps
<b>Transmitter damping</b>	50, 75, 220, 1000 [Ω]

### Receiver

<b>Frequency ranges</b>	LP 0.2 – 2 MHz, 2 MHz, 4 MHz, 5 MHz Broadband 1.3 – 14 MHz, 10 MHz HP 4.9 – 22 MHz, 0.8 – 8 MHz
<b>Adjustable gain</b>	110 dB in 0.1/1/2/6/12 dB steps

# Technical Data (continued)

Echo Evaluation, Flaw Size Determination	
<b>Display of echo height</b>	<ul style="list-style-type: none"> <li>▪ % screen height (%SH)</li> <li>▪ dBrel (DGS, DAC, TCG, JIS, AWS versions)</li> <li>▪ dBabs</li> <li>▪ indication rating acc. to AWS D1.1/1.1M</li> <li>▪ region of echo height acc. to JIS Z3060-2002</li> <li>▪ mmFBH (DGS option)</li> </ul>
<b>Display of time of flight</b>	<ul style="list-style-type: none"> <li>▪ sound path</li> <li>▪ depth, projection distance and reduced projection distance</li> <li>▪ sound transit time</li> <li>▪ resolution 0.1 mm</li> </ul>
<b>Display of wall thickness / sound velocity</b>	<ul style="list-style-type: none"> <li>▪ wall thickness measurement: 0.01 mm resolution (optional display of sound velocity to a given wall thickness)</li> <li>▪ min/max wall thickness</li> </ul>

Options	
<b>AWS</b>	AWS D1.1
<b>DAC/TCG</b>	max. 16 points, TCG 40 dB dynamic range
<b>DGS</b>	backwall, flat bottom hole or side drilled hole as reference
<b>JIS</b>	JIS Z3060
<b>TOFD / B-Scan / Strip chart / Matrix memory</b>	
<b>Output module</b>	for link-up to test automation

Monitor	
<b>Number of monitors</b>	3
<b>Response time</b>	with pulse repetition frequency (max. 5000 Hz)
<b>Operation modes</b>	normal, inverse, off
<b>Setting range</b>	<ul style="list-style-type: none"> <li>▪ monitor start: 0 – 20000 mm in 0.1 mm steps</li> <li>▪ monitor width: 0 – 3000 mm in 0.1 mm steps</li> </ul>
<b>Positioning</b>	<ul style="list-style-type: none"> <li>▪ independent manual adjustment</li> <li>▪ coupling of monitor 1 and monitor 2</li> <li>▪ automatic positioning depending on the skip distance for angle beam probes</li> </ul>
<b>Visual indication</b>	3 LED's on front panel
<b>Acoustical indication</b>	alarm sound

Storage	
<b>SD flash card</b>	8 GB industrial card (up to 32 GB usable)
<b>Data format</b>	CSV
<b>Image format</b>	BMP

Inputs and Outputs	
<b>Probe connector</b>	2 x LEMO 1
<b>USB interface</b>	LEMO-B, 4 pin (adapter cable with USB type A)
<b>VGA output</b>	standard VGA socket (15 pin D-Sub)
<b>Trigger input/output</b>	LEMO-1B, 10 pin: TTL level (5V), low active

Further Features	
<b>Measuring units</b>	switchable mm, inch
<b>Date and time</b>	built-in real-time clock
<b>Languages</b>	English, German, further languages on request
<b>Permissible temperatures: Operation (with batteries/storage temperature)</b>	-10 °C to +50 °C / -20 °C to +60 °C

Power Supply	
<b>Mains operation</b>	via mains power supply (article no. 1808.503) <ul style="list-style-type: none"> <li>▪ 100 - 240 VAC, 50 - 60 Hz</li> <li>▪ output: 12 VDC, 4 A</li> <li>▪ permissible operating temperature: 0 °C to +50 °C</li> </ul>
<b>Battery operation</b>	approx. 9.5 hrs (with factory settings) with built-in Li-ion rechargeable battery
<b>Power saving mode</b>	on / off
<b>Automatic switch-off</b>	in case of low voltage of mains or battery

Dimensions and Weight	
<b>Dimensions (H x W x D)</b>	<ul style="list-style-type: none"> <li>▪ 138 mm x 249 mm x 52 mm without protective holster</li> <li>▪ 149 mm x 262 mm x 54 mm with protective holster</li> </ul>
<b>Weight</b>	2.0 kg (with Li-ion battery and protective holster)
